

NEO MAGADANI

UX/UI Designer · UX Research · Customer Experience

Pretoria, South Africa · +27 72 262 1761 · Magadanineo@gmail.com · Portfolio: www.neomagadani.co.za

UX/UI Designer with a psychology background, working across research, information architecture, wireframing, prototyping and interface design. Four years in customer service and programme administration before that taught me how to read what people need, spot patterns in messy information and turn that into something usable. That's the throughline in my design work now.

CORE SKILLS

UX Research & Insight

Research Methods • Qualitative & Quantitative Research • Academic Research • User Interviews • Surveys & Questionnaires • Usability Testing • Customer Needs Analysis • Competitor Research • Personas • Journey Mapping • Research Synthesis • Pattern & Theme Identification

UX & Product Design

User Flows • Information Architecture • Wireframing • Prototyping • Interaction Design • High-Fidelity UI Design • Responsive Design • Design Systems • Accessibility Basics

Customer & Stakeholder Experience

Customer Service • Pain Point Identification • Stakeholder Communication • Requirements Gathering • Documentation • Data-Informed Decision Making

Tools & Technology

Figma • Webflow • HTML • CSS • JavaScript • React • REDCap • Notion • ClickUp • Google Workspace

UX/UI DESIGN EXPERIENCE

Freelance UX/UI & Web Designer | Self-Employed

Jan 2024 – Present

- Design digital experiences for client and portfolio work, covering problem definition, information architecture, wireframes and high-fidelity interfaces.
- Run competitor research and user-focused analysis to guide navigation, layout and interaction decisions.
- Build responsive interfaces in Figma and turn them into working sites with HTML, CSS, JavaScript and Webflow.
- Present design work and progress directly to clients, adjusting based on their feedback and constraints.
- Use AI tools for research support and documentation, reviewing and refining everything myself before it goes out.

SELECTED UX PROJECTS

UI/UX DESIGN & CLIENT PROJECTS

Freelance UI/UX & Web Designer | Independent Projects

Jan 2024 – Present

- Design and develop digital experiences for client projects and self-initiated portfolio concepts.
- Translate project requirements into page structures, navigation, wireframes and interface designs.
- Use competitor analysis and user-centred design principles to inform layout, content hierarchy and interaction decisions.
- Create responsive interfaces and translate designs into functional websites using HTML, CSS, JavaScript and Webflow.
- Communicate design decisions with clients, incorporate feedback and work within project requirements.
- Apply technical knowledge to consider feasibility, responsive behaviour and implementation requirements.

Selected Client Project: TCM² Holdings | Website Design & Development

- Designed and developed a business website to establish a professional digital presence.
- Built the website using web technologies and configured business contact functionality.
- Worked on the presentation of business information to make the organisation's services and contact details accessible to visitors.
- Connected design decisions with implementation requirements to deliver a functioning client website.

Portfolio Project: Thrive Support Network | Case Management Dashboard

Self-initiated UX/UI concept

- Designed a dashboard concept intended to help social workers navigate case information and reporting tasks.
- Explored information architecture, form structure and interface hierarchy for a workflow involving complex case information.
- Developed interface concepts focused on making information easier to scan and administrative tasks easier to follow.
- Used the project to demonstrate dashboard design, workflow thinking and interface problem-solving.

Portfolio Project: Tshwane Transit | Public Transport Experience

Self-initiated UX/UI concept

- Developed a digital transport experience concept focused on journey planning and access to public transport information.
- Explored user flows, information structure and interface layouts for common passenger tasks.
- Designed screens intended to support clear navigation and access to journey information.
- Used the project to demonstrate responsive interface design and end-to-end product thinking.
- Recorded an increase in website clicks from 5 in one monthly reporting period to 180 in the next, based on the available figures. The change is reported as an observed result, not attributed solely to the website design.

Client Project: Rebus Brokers | Website/UI Design

- Worked on a digital design project for an insurance brokerage business.
- Focused on presenting business information through clear page structure, navigation and interface layouts.
- Applied visual hierarchy and content organisation principles to support a more understandable digital experience.

EDUCATION

BA Honours in Psychology | University of Johannesburg

2017

Foundation in human behaviour, psychological research, critical analysis and academic research methods.

Bachelor of Social Sciences in Psychology | North-West University

2016

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Diploma in Interaction Design | Alison

Software Engineering Programme | ALX | 2023–2025 — HTML • CSS • JavaScript • React

Foundations of Mental Health & Psychosocial Support (MHPSS) | Kaya
